[Music] [Applause] [Music] [Applause] [Music] [Applause] [Music] [Applause] what's up good people how you doing welcome back to stock up with larry jones we're going to discuss some stock the president will soon be laying out his infrastructure bill and it is going to affect the stock market and it's going to affect a lot of the stock that you guys are in all right and that i'm in definitely um i bought some stock two two days ago uh monday night on my weeble app because it was aftermarket and i'm gonna share a snapshot with that with you guys that's really not my thing sharing my portfolio like a lot of other guys do that's cool i'm going to share with you because i want to show you what's happening okay and so what's going to happen is well let's let's discuss this real quick in the past previous administrations have tried to do an infrastructure bill and it never really take taking off one of the main reasons is the technology wasn't up to par with the bills right the tech the bills were ahead now it's the other way around the technology not only is it available but it is alive and well and it's ahead of the bills and so this time it's different i believe remember i'm not your financial advisor and neither do i play one on tv but you must do your own due diligence okay but i want to tell you guys that there is money to be made um right now and i'm going to suggest that you guys

go long term and look at some long-term stock especially with infrastructure infrastructure you're talking about years and you're talking about good growth stock let's discuss a few right now um let's let's discuss the long low-hanging fruit \$tesla \$cci veal \$lucid motors and \$neo those are all ev stocks electric vehicles that's what ev stands for for those of you that's new these three stocks will be affected by this bill they're already affected by the bill and the president hasn't even spoken yet and i'm going to add a fourth one to that uh \$aapl \$apple uh because i believe \$apple car is coming so when do you get into this play not when they make the announcement you get into it now where it's been beaten down and you start adding to your positions over a period of time and for those of you that's following my five dollar a day million dollar cup of coffee challenge \$apple is in there okay so \$tesla \$cciv \$neo and \$apple we want to look at these and if you think it's too late to get in it's not all right so uh let me cut in right here this is my portfolio on my weeble app right i bought these monday night uh um in chicago time about 6 30. all right so after the market closed that's what the weeble app allows you to do there's a link below click the link download the app get two free stock worth up to eighteen hundred and fifty dollars i am part of a part of their affiliate program but i love this app because it absolutely makes me more money it doesn't matter if you have two or three other brokerages already all right download the weibo app and do yourself a favor you'll thank me later all right so let's keep it moving

so what else is going to be affected

charging stations and here are some of the ones i want you to look at that i'm

bullish on

\$chpt \$charge point as you you saw in my uh portfolio

in two days i'm up uh \$fuel cell \$f

c e l uh \$plug

\$p l u g and \$blink \$blnk

those are up already they're green

already and if you

think that it's too late they're already

up you're so

so so so wrong these

are long-term plays all of these stock

that i'm talking to you about

you should consider keeping these from

three to five years

and even if you didn't there's money to

be made for instance

my portfolio that i'm showing you on my

weeble

these are secondary purchases i have all

of these stock

that i've bought many months ago uh

um um in a bigger portfolio

i could literally sell these take the

profit and go

right but i also have the same stock

long term

so listen good people we have to we have

to make

long-term investing sexy again we've

we've

we're trying to be johnny day trader and

this is not

the atmosphere for that right so let's

look at a few more

things that i think that you should be

looking at i think you should be looking

at steel companies

so i want you guys to do your research

if the infrastructure

bill gets passed our roads bridges

are in horrible condition we should be

looking at

steel and we should be looking at

concrete

companies so i got i want you guys to

leave me a comment after you do your

research

leave me a comment we know about the

low-hanging fruit the \$tesla's in the in

the \$charge points

but let's look at steel and let's look

at concrete companies that are publicly traded good people and i'm telling you an infrastructure bill it's like the roaring 20s it's there is a lot of uh uh jobs that's going to be created and now it's just not all green and everything is fine there's going to be a fight and then the president of course is going to tax corporations which the stock market does not like and i don't like it either and so it's not just a lay down everything is fine let's start printing money though i do see greener paths we're over q1 right now and i've been telling you guys since last year q1 there was going to be a correction you know um i'm no genius everybody saw it coming and so generally after the first quarter we do better right and so let's get the first quarter behind us and let's start on a recovery and let's go into another bull market we have the opportunity to do that and i hope congress don't jack that up which they are good at doing jacking stuff up all right good people so let's look at these stocks leave me a comment good people let's look at i know there's a whole bunch of other clean energy charging stations and all of that it's fine to leave a comment on that hey what about this what about that it's okay to leave those comments but let's do a deep dive and let's look at some concrete companies let's look at some steel companies good people and this is going to help you broaden vour uh portfolio remember we want the boat to be balanced we don't want to just be in charging stations

and then let's listen to the the

president and let's see what's in the infrastructure bill and let's see where there's other opportunities to make more money i'm sorry you guys i got allergies to make more money okay so let's get busy let's make a lot of money let's do our research remember we're looking for concrete and steel companies okay and let's have another discussion after the president lays out his infrastructure bill okay good people and remember uh there's a link below for the weeble app click the link right now deposit a hundred dollars right now and um um get two free stock worth up to eighteen hundred and fifty dollars that's not the big deal the big deal is if you live on the east coast new york you could start trading as early as 4 00 a.m until 8 pm uh chicagoland you could start trading at 8 00 p.m up to 7 p.m i mean 8 a.m to 7 p.m and you do the math uh for those of you that live uh out in la all right good people hey we're gonna talk to you hopefully again today love you guys uh i see greener paths i feel better about the market looking forward and let's make some money alright live love laugh and learn hello my name is larry jones from stock up with larry jones and i want to talk about this wonderful app called weeble i am a big fan of weibo number one the fact that i could

hours before the market opens in hours

that i can have a phone friendly app and the necessary tools that set me up for

as a matter of fact the longer i use

trade

after it closes

weibo the more

savvier investor i become and i also love the fact that if you're new you can deposit a hundred dollars get two free stock worth up to and 1850 dollars hey this is an app that i could get behind this is a company that that i can get behind as an influencer for the last couple of months i can tell you the customer service has been impeccable i can call a number i can talk to a real live person that actually knows what they're doing okay for those of you that haven't done it already click the link below download the app deposit a hundred dollars and be on your way to more savvier investments all right hey happy birthday happy fifth birthday weeble
